

## PROFESSIONAL SUMMARY

Full-stack developer with 2+ years of experience building high-traffic, production-grade web applications and microservices. Strong expertise in Node.js and Go, with hands-on experience in payments, RBAC, real-time systems, and analytics.

## TECHNICAL Skills

- **Languages:** TypeScript, JavaScript (ES6+), Go
- **Frontend:** NextJS, ReactJS, Redux Toolkit, Tailwind CSS, ShadcnUI, Vite, Zustand
- **Backend & Databases:** NodeJS, Express, Fastify, Go (Gin), REST APIs, WebSockets, PostgreSQL, MySQL, MongoDB, Redis, RabbitMQ, Prisma ORM, Microservices
- **Developer Tools:** Docker, Git, GitHub, Postman, VS Code, Vercel, Figma

## EXPERIENCE

- **DOTIX Technologies Pvt. Ltd.** May 2024 - Present  
*Fullstack Developer (Full-time)*  
Worked on large scale production systems serving lakhs of users, building secure APIs, dashboards, and real-time features using Go, Node.js, Next.js, MySQL, PostgreSQL, and Redis.  
**Key Projects:**
  - **Omnibase** (Go, Gin, Node.js, React.js, TailwindCSS, MySQL, PostgreSQL, Redis, Firebase)
    - \* Built and maintained a multi-tenant backend platform supporting **500K+ users** across multiple applications..
    - \* Designed scalable authentication, application management, and payout services with strong data integrity.
    - \* Implemented payout workflows integrating **Cashfree and Xoxoday**, including failure recovery and reconciliation.
    - \* Built a centralized **admin dashboard with RBAC and 2FA-secured** access to manage applications, users, devices, payouts, and real-time analytics, with **Firebase-powered real-time notifications** across apps.
    - \* Integrated **Google OAuth** for Google Reviews ingestion and secure third-party data access.
  - **Reward Hub** (Next.js, Node.js, Express.js, MySQL, OCR, OpenAI API, Tailwind)
    - \* Built an **automated review processing system using OCR** that analyzes screenshot submissions across multiple platforms (Play Store, Google Maps), processing **thousands of daily submissions** with **85% fraud detection accuracy**.
    - \* Implemented campaign rotation, daily caps, fraud checks, and submission workflows.
    - \* Developed admin dashboards for transaction tracking, campaign management, and analytics.
  - **Adperk – Offerwall Platform** (Next.js, Node.js, Express, EJS, MySQL, Redis, Microservices)
    - \* Built a **full-scale offerwall platform** with campaign management, user tracking, and **automated payouts handling 1000+ daily transactions** across multiple reward types.
    - \* Designed **backend microservices** for SDK APIs, callback processing, event tracking, and real-time analytics.
    - \* Designed and developed **role-based dashboards** for super admin, advertiser, and publisher, enabling campaign and app creation, team-level access control, and full visibility into **real-time revenue, conversions analytics**.
- **TheAdzPlug** March 2024 - May 2024  
*Web Developer (Internship)*
  - Developed responsive web interfaces and dashboards using React.js, Tailwind CSS, and modern UI practices for enhanced usability and design consistency.
  - Integrated APIs to build dynamic, data-driven components, improving interactivity and performance across the platform.

## PERSONAL PROJECTS

- **Templr — Email Template Builder (SaaS)** [Live Link](#)  
*React.js, Typescript, Node.js, Express.js, PostgreSQL, OAuth, Tailwind CSS, ShadcnUI, Zustand, Vercel*
  - Built **full-featured drag-and-drop HTML email template builder** with a modern dashboard for creating, managing, and exporting responsive email templates.
  - Built **secure authentication system and dashboard** enabling users to save, organize and manage email projects and manage media, images and profile.
  - Developed backend services for template rendering and integrated **Gmail export** to preview and send generated emails directly from the platform.

## EDUCATION

- **SSLDV College Of Engineering** Aligarh, India  
*Bachelor of Computer Applications; GPA: 7.5* July 2021 - June 2024
