## Career Objective:

A motivated and passionate B. Tech student specializing in Information Technology with hands on experience in front-end and back-end development using React, Nodejs, Express, MongoDB (MERN). Seeking an entry-level developer position to leverage my academic background and technical skills to contribute to innovative software solutions and enhance my professional growth.

## Skills

- **Primary Skills:** JavaScript, ES6, HTML5, CSS3 , Tailwind CSS
- **Secondary Skills** Java, C, C++
- **Databases:** MongoDB
- **Development Methodologies/ Technologies:** Git, Git Bash, GitHub, Postman

## Personal Project:

**E-Commerce App:** Developed a full-stack e-commerce app utilizing Node.js, React.js, and MongoDB to provide a seamless shopping experience.

- **Frontend (React):** React creates a dynamic, user-friendly interface where users can explore lots of products based on their requirements.
- **Backend (Node.js/Express):** The backend manages API calls. It is used to fetch the overall data from the database to the client side.
- **Database (MongoDB):** MongoDB stores products metadata based on their categories.

**Twitter UI Clone:** Developed a frontend part of the social application X formally known as Twitter using technologies such as HTML5 and CSS framework Tailwind CSS.

- **Frontend (HTML5):** The Frontend part of the clone is build using HTML5.
- **Styling (Tailwind CSS):** Tailwind provides multiple utility classes which are used to write tailwind in a very effective way.
