Summary

Full-stack developer with hands-on experience designing and delivering scalable, high-performance web applications across MERN and Angular ecosystems. Skilled in clean architecture, RESTful APIs, and database modeling with a strong focus on maintainability, performance, and security. Adept at cross-team collaboration and translating complex requirements into elegant technical solutions.

Skills

Frontend: React, NextJS, Angular, Redux, Zustand, Tailwind, TypeScript, HTML5, CSS3

Backend: Node.js, Express.js, NestJS, REST APIs, Authentication, RBAC

Databases: PostgreSQL, MongoDB, MSSQL

DevOps & Tools: Git, Docker, Postman, Linux, CI/CD (basics)

Core Strengths: System Design, Clean Code, Performance Optimization, Debugging, Problem-Solving

Experience

Software Engineer *Intimetec, Jaipur* Oct 2025 – Present

- Architected and optimized backend services using NestJS and PostgreSQL, improving query response time by 35% under high concurrency.
- Delivered RESTful API integrations and modular UI workflows in React and Angular for enterprise clients.
- Enhanced system performance through schema refinement, caching, and asynchronous job processing.

Junior Software Engineer *Intimetec, Jaipur* Jun 2024 – Oct 2025

- Developed full-stack features using ReactJS, Next.js and NestJS, maintaining high code quality and test coverage under tight deadlines.
- Contributed to a large-scale Angular client platform, implementing reusable UI components and optimizing rendering efficiency.
- Collaborated in Agile sprints, participating in code reviews, requirement discussions, and deployment planning.

Software Development Trainee *Intimetec, Jaipur* Jan 2024 – Jun 2024

- Trained in full-stack development using MERN, Next JS and Angular stacks with emphasis on clean code and maintainable design patterns.
- Built internal practice projects demonstrating authentication, REST APIs, and CRUD functionality.

Freelance Web Developer *Remote* Jan 2022 – Dec 2022

- Designed and delivered responsive websites and dashboards for small businesses using MERN stack and TailwindCSS.
- Managed client communication, requirement gathering, and deployment independently to ensure timely delivery.

Projects

News Aggregator Platform (Node.js, PostgreSQL, React)

- Developed a personalized news platform with user recommendations, reading history, and reactions.
- Implemented structured service layers, REST APIs, and database migrations using Prisma.

Task Management App (MongoDB, Express, React, Node.js)

- Built a task management platform with authentication, flexible filters, and cloud-based persistence.
- Emphasized modular backend design and reusable UI components for rapid iteration.

Education

B.Tech, Computer Science Engineering Techno NJR Institute of Technology Sep 2020 – Jun 2024

- CGPA: 8.84
- Relevant Coursework: Data Structures, Algorithms, DBMS, Web Technologies
