

# Ishita Sharma

Results-driven IT Professional with **4 years of experience** as a Senior systems engineer at Infosys, recently transitioned into **UI/UX Design**. Completed a hands-on internship at TATA 1mg, where I gained practical experience in user-centered design, wireframing, prototyping, testing. Eager to leverage my technical background and design skills to create intuitive and impactful user experiences in a dynamic design-focused role.

UI/UX DESIGNER

## WORK EXPERIENCE

### Freelance Designer

Y Design (Singapore) | Jul 2024 - Present

- Executed diverse digital and print design projects, including social media content, marketing collateral, posters, and business cards.
- Designed and built responsive landing pages (figma) and websites (wix, framer) for various client needs.
- Collaborated on branding initiatives, including logo ideation and creating compelling project showcases.

### UI/UX Designer

TATA 1MG | Feb 2025 - Aug 2025

In my 6-Month UI/UX Design Internship, I:

- Led UX design process for a smart package recommendation system, guiding users through health questionnaires to deliver personalized results.
- Utilized the ant design system in figma to ensure UI consistency and efficient component integration, particularly for building interactive dashboard development which improved **efficiency by 40%**.
- Contributed to visual design, including packaging and marketing assets, for the recommendation system.
- Conducted usability testing, a/b testing, and accessibility audits (WCAG 2.2), leading to a **20% boost in conversion** rates.
- Applied end-to-end design thinking, from initial user research to final UI, prioritizing consistency and accessibility.

### Senior System Engineer

INFOSYS | Dec 2021 - Dec 2024

- Executed **1000+** test cases, boosting test coverage by **25%** across functional, regression, and integration scenarios.
- Identified and prioritized usability issues and defects, collaborating with cross-functional teams to streamline processes and ensure agile delivery.
- Earned an early promotion for high-impact performance in QA, consistently ensuring smooth user flows and product stability.
