SUMMARY

Full-stack Software Engineer with 3+ years of experience building scalable web applications using modern JavaScript frameworks. Proven expertise in Angular, React, Node.js, and database management. Delivered high-impact solutions across fintech and e-commerce domains, collaborating with cross-functional teams to drive product innovation and technical excellence.

TECHNICAL SKILLS

Frontend: Angular, React, Next.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, Responsive Design

Backend: Node.js, Express.js, RESTful APIs, Microservices Architecture

Database: MongoDB, MySQL, Database Design & Optimization

Tools & Technologies: Git, Docker, PayPal Integration, Agile/Scrum, CI/CD, Jest, Webpack

Concepts: MEAN/MERN Stack, Full-stack Development, Object-Oriented Programming, Data Structures & Algorithms

EXPERIENCE

Software Engineer

Flexsin Inc.

October 2024 – Present

Sector 62, Haryana

- Architected and deployed full-stack web applications using Angular, React, and Node.js, serving 10,000+ users with 99.9% uptime
- Optimized database queries in MongoDB and MySQL, reducing average response time by 40% and improving application performance
- Collaborated with cross-functional teams across 5+ concurrent projects, delivering client solutions 15% ahead of schedule
- Implemented responsive UI components and integrated third-party APIs, enhancing user experience and functionality

Full Stack Developer

Evra Media Pvt. Ltd.

September 2023 – August 2024

Faridabad, Haryana

- Developed end-to-end features for e-commerce platform using MEAN stack, resulting in 25% increase in conversion rates
- Built reusable Angular components and services, reducing development time by 30% across multiple projects
- Designed and implemented RESTful APIs with Node.js/Express, processing 50,000+ daily transactions
- Integrated PayPal payment gateway with robust error handling, achieving 99.5% transaction success rate

Angular Developer

Evra Media Pvt. Ltd.

February 2023 – August 2024

Faridabad, Haryana

- Led frontend development initiatives using Angular framework, implementing modern design patterns and best practices
- Optimized bundle size and lazy loading strategies, improving initial page load time by 50%
- Conducted code reviews and mentored junior developers on Angular best practices and TypeScript usage

Software Engineering Intern - MEAN Stack

Moglix (Credlix Department)

June 2022 – December 2022

Sector 125, Noida

- Contributed to Credlix fintech platform development, implementing features for loan management and financial workflows
- Developed interactive dashboards using Angular and Chart.js for real-time financial data visualization
- Collaborated with senior engineers to debug and resolve production issues, maintaining 99% system reliability

EDUCATION

Institute of Management Technology (IMT) Faridabad

Master of Computer Applications (MCA) - Computer Applications

October 2022 – September 2024

CGPA: -

Aggarwal College, Ballabgarh

Bachelor of Computer Applications (BCA) - Computer Application

August 2019 – July 2022

Percentage: -

PROJECTS

Namba - RC Boat Racing	race.namba.com
<i>React, Node.js, MySql</i>	
<ul style="list-style-type: none">• A Boat race management system developed the Dynamic store management system for race entries and product management with many more complex features with partition refund types and many more.	
 Quest Alliance -Self Learning	questalliance.net
<i>Angular</i>	
<ul style="list-style-type: none">• A Boat race management system developed the Dynamic store management system for race entries and product management with many more complex features with partition refund types and many more.	
 Dopoxy - Dating App	dopoxy.com
<i>Node.js, MongoDB</i>	
<ul style="list-style-type: none">• Developed the backend for Dopoxy, a feature-rich dating app, ensuring robust functionality and performance. Also built the admin panel using React, focusing on an intuitive interface and seamless management capabilities.	
 Revamp of Cuniverse - Music Selling Website	Thecueniverse.com
<i>NextJs, Laravel, MySql</i>	
<ul style="list-style-type: none">• A full-featured music marketplace supporting subscription-based access and single-song purchases with secure payment integration. Designed scalable modules for song listing, search/filter, user playlists, and streaming previews, ensuring fast performance with large song catalogs.	
 Pantheia - Multi Vendor Ecommerce Platform like Amazon	pantheia.com
<i>Angular</i>	
<ul style="list-style-type: none">• Developed Pantheia, a scalable Angular-based admin panel with modular architecture and reusable UI components. Implemented role-based routing, dynamic page titles, breadcrumb navigation, and optimized state management for smooth user experience. Enhanced performance through lazy loading, API integration, and clean component-driven design following best Angular practices.
