## WORK EXPERIENCE

### Payworld Digital Services

Software Engineer

Oct 2024 - Present

- Designed and implemented RESTful backend APIs using PHP (CodeIgniter & Laravel) for core fintech modules including Beneficiary Management, Merchant Onboarding, Transactions, AEPS services, and PPI Wallet.
- Currently building and managing Payment Soundbox APIs, handling merchant onboarding, activation, and deactivation workflows with secure backend logic.
- Developed and maintained frontend interfaces for the *Travel Exotic* platform using Vue.js, HTML, CSS, and JavaScript, ensuring responsive and user-friendly.
- Integrated SQL databases for efficient data storage and transaction handling.

### Viral Web Tech

Web Developer Intern

Sep 2023 - Dec 2023

- Developed Hungry Palette, a responsive restaurant website with multiple interactive sections including Home, Dishes, About, Menu, Review, and Order using HTML, CSS, and JavaScript.
- Built a responsive website for Jain Rice brand using HTML, CSS, and JavaScript, showcasing products and brand information.
- Designed interactive UI with smooth navigation and optimized visuals to enhance user experience and highlight products.

## PROJECTS

### WANDERLUST

- A full-stack hotel booking platform inspired by Airbnb, enabling users to list, browse, and book accommodations with reviews and ratings.
- Built frontend using React.js with dynamic pages, forms, and responsive UI, and backend using Node.js and Express.js with MongoDB for database management.
- Implemented middleware and server-side validation for secure and robust backend operations.
- Integrated features such as user authentication, booking management, and review system, ensuring smooth end-to-end functionality.

### TRAVEL EXOTIC

- A travel booking platform similar to MakeMyTrip, handling frontend with Vue.js and backend integration using PHP and Laravel.
- Implemented dynamic booking and search features with smooth UI interactions.
- Managed database operations with SQL for user, booking, and transaction data.
- Ensured responsive design and seamless communication between frontend and backend.

## HUNGRY PALETTE

- A responsive food restaurant website with interactive sections: Home, Dishes, About, Menu, Review, and Order using HTML, CSS, and JavaScript.
- Implemented an automatic image slider on the Home page to showcase featured dishes dynamically.
- Created interactive menu and dish displays with hover effects and “add to cart” functionality.
- Ensured responsive design for optimal viewing on desktop and mobile devices.

## SKILLS

---

- **Programming & Data Structures:** C/C++, Python, Data Structures & Algorithms (DSA)
- **Frontend Development:** HTML, CSS, Bootstrap, JavaScript, React.js, Vue.js
- **Backend Development:** Node.js, Express.js, RESTful APIs, PHP, Laravel, CodeIgniter
- **Databases:** SQL, MongoDB
- **Other:** Full-Stack Development, Responsive Web Design, UI/UX Implementation

## EDUCATION

---

- **B.Tech (CSE)** | Guru Tegh Bahadur Institute of Technology | CGPA: 9.09 | July 2025
- **XII (CBSE)** | St. Joseph's Convent School | 87.4% | July 2021
- **X (CBSE)** | St. Joseph's Convent School | 75% | May 2019
