SUMMARY

Experienced Full Stack Developer adept at leveraging 2+ years of hands-on experience to drive innovative solutions and meet project goals. Proficient in applying expertise garnered from previous projects to tackle new challenges and assignments, while collaborating effectively with team leaders and supervisors.

EXPERIENCE

PARAHIT TECHNOLOGIES LIMITED

SOFTWARE DEVELOPER   Khanpur, New Delhi   2024-July - Present

- Developed and maintained responsive web applications using core technologies including HTML, CSS, and JavaScript.
- Enhanced front-end functionality and user interface by implementing Bootstrap, jQuery, DataTables, and jQuery Validation.
- Collaborated with teams to integrate PHP, Laravel, and CodeIgniter, supporting dynamic content management and feature development.
- Designed and optimized MySQL databases to ensure efficient, high-performance data handling for web applications.
- Integrated WhatsApp Meta APIs to support advanced user communication features, enhancing engagement.
- Built and managed a role-based application, creating secure user access controls based on defined roles and permissions.
- Developed dynamic dashboards with Chart.js to visualize real-time data and key performance metrics.
- Created a CPaaS (Communication Platform as a Service) using Laravel, featuring a robust Super Admin panel for full control and management.
- Developed RESTful APIs for seamless integration between front-end interfaces and back-end services.

CYBERTRON TECHNOLOGIES

SOFTWARE DEVELOPER   Mohali, Punjab   2022-Dec - 2024-Jan

- Developed and maintained responsive web applications utilizing HTML, CSS, and JavaScript.
- Implemented front-end designs using Bootstrap and jQuery, enhancing user interaction and interface aesthetics.
- Collaborated across departments to integrate PHP and ExpressionEngine, facilitating dynamic content generation and management.
- Designed and optimized MySQL databases, ensuring efficient data storage and retrieval for high-traffic platforms.
- Specialized in customizing video player solutions, including video.js, player.js, and jwplayer, within ExpressionEngine and JavaScript environments.
- Integrated weather APIs to provide users with real-time weather updates, enhancing application functionality and user experience.

MySQL

PROJECTS

- ## WhatsApp Automation & Engagement Platform

  Description: Developed a full-featured WhatsApp automation platform similar to AiSensy using WhatsApp Business API. The platform enables businesses to manage communication workflows through bulk messaging, chatbot automation, agent chat interface, and campaign tracking.

  Key Features:

  - Authentication & OTP Verification – Secure login with OTP-based verification.
  - Business & Project Management – Manage multiple businesses and WhatsApp projects.
  - Template Management – Create, update, and manage WhatsApp templates.
  - Single & Bulk Messaging – Send individual or bulk WhatsApp messages using CSV upload.
  - Chatbot Flow Builder – Design interactive chatbot flows.
  - ChatView & Agent Chat Interface – Real-time customer chat management.
  - DataTables Integration – Dynamic, searchable, and paginated data handling.

  Technologies Used: CodeIgniter 3, HTML5, CSS3, Bootstrap 4, JavaScript, jQuery, Validation.js, DataTables, AJAX, AiSensy APIs

- ## RCS Platform using Gupshup

  Description: Designed and developed a conversational messaging platform using Gupshup APIs to manage bots, templates, and deliver RCS messages for rich, interactive communication.

  Key Features:

  - Bot Creation with Gupshup API – Integrated Gupshup's bot building and deployment APIs.
  - RCS Messaging Integration – Sent rich media messages like images, buttons, and carousels.
  - Template Management – Automated creation and approval of templates.
  - User Authentication with OTP – Implemented secure OTP-based access.
  - Interactive UI – Enhanced user management using validation and DataTables.

  Technologies Used: CodeIgniter 3, HTML5, CSS3, Bootstrap 4, JavaScript, jQuery, Validation.js, DataTables, AJAX, Gupshup APIs

- ## CPaaS Super Admin Panel

  Description: Developed a powerful Super Admin panel for a Communication Platform as a Service (CPaaS) system using Laravel 12. Includes OTP-based authentication, user and service management, dynamic plan mapping, and analytics dashboards.

  Key Features:

  - OTP-Based Authentication – Secure login via SMS and Email OTP verification.
  - User Management – Create, update, and delete users with role-based control.
  - Service Management – Manage SMS, WhatsApp, and Email communication services.
  - Plan Creation & Mapping – Assign and configure service plans.
  - Real-Time Dashboard – Display live statistics of users, services, and plans.
  - Role-Based Authorization – Super Admin-exclusive functionality.

  Technologies Used: Laravel 12, HTML5, CSS3, Bootstrap 5, jQuery, AJAX, DataTables, Validation.js, SMS & Email OTP APIs, RESTful APIs
