Portfolio

Linkedin

A highly skilled full-stack developer with strong professional experience in creating websites/web apps from base to root . I have built CRM platforms , responsive and interactive frontend, and scalable backend. I also have knowledge of AWS deployment using ec2 instances,etc.

WORK EXPERIENCE

Terra Charge India (Full - Time)   **Jan 2024 - Present**

- Built full-stack app for vehicle charging using **React.js** for frontend , **Django** for backend and **Hasura** for socket integration for live update.
- Also worked on building **CRM - dashboard** for clients and customer support team for managing and seeing useful insights with the help of graphs and data. Also built using **React.js.**
- All the web app's built during this tenure are built with multi country approach to handle user base and chargers in various countries the company operated.
- Integrated payment gateways like **Phonepe** for India , **Xendit** for Indonesia and **Omise** for Thailand.

Learn Know Digital (Internship)   **Nov 2023 - Dec 2023**

- Worked as a front -end developer . Job mainly comprised of building companies **React.js** website and maintaing there clients website.
- Built around 4 highly responsive web apps for companies clients as it was a service based corporation.
- Used css tools like **Material UI , Tailwind CSS ,** etc depending on the requirement.

PERSONAL PROJECTS

MoviePlix

- Developed a config driven movie trailer website for users to watch and browse latest movies trailers.
- Utilized Tailwind and used React for faster production and better build.
- Successfully implemented SEO best practices, resulting in better Google search indexing .

JobShala

- Created a job search website for providing one stop solution to get all the job posting throug platforms like linkedin, internshala,etc. .Utilized Saas preprocessor for styling and used React.js.
