Akash Sharma

Full Stack Developer

akashsharma01247@gmail.com | +91 8459148074 | Delhi, India | Github | LinkedIn

🪪 PROFILE

Detail-oriented Full Stack Developer with 2+ years of experience contributing to the design, development, and deployment of robust web solutions. Strong understanding of software development best practices, system performance optimization, and cross-functional collaboration. Focused on delivering high-quality, efficient, and reliable products.

💼 PROFESSIONAL EXPERIENCE

Dapplogix Software Pvt. ltd., *Software Developer*   2024 – Present | Noida,Uttarpradesh
Key Responsibilities:

- Developed responsive, user-centric interfaces using modern JavaScript frameworks such as React.js and React Native, ensuring seamless cross-platform experiences.
- Designed and built RESTful APIs and backend services using Node.js and Express.js, enabling scalable and maintainable server-side logic.
- Utilized MongoDB for efficient data storage and management, focusing on scalability, indexing, and performance optimization.
- Implemented secure authentication and authorization systems using JWT and OAuth, enhancing application security.
- Integrated third-party services and APIs such as payment gateways, Google Maps, and Auth0, expanding application capabilities.
- Wrote and maintained unit and integration tests to ensure code quality, reduce bugs, and enhance reliability during continuous development.
- Conducted thorough testing and debugging of applications, resolving performance bottlenecks and functional issues.
- Actively participated in code reviews, sharing constructive feedback to promote clean code, best practices, and team-wide maintainability.

Sveltetech Technologies Pvt. Ltd, *Associate Software Developer Intern*   12/2023 – 05/2024 | Gurugram,Haryana
Key Responsibilities:

- Built responsive user interfaces and reusable UI components to improve usability and performance.
- Integrated RESTful APIs and third-party services to support core application features.
- Collaborated with cross-functional teams to gather requirements and deliver technical solutions.
- Assisted in deployment, testing, and performance optimization of web applications.
- Worked with databases for data storage, retrieval, and optimization.
- Debugged and resolved software defects to ensure smooth application functionality.

- **Development Tools:** VS Code, Postman, Docker, npm, yarn
- **Others:** API Integration, Performance Optimization, SEO, Data Structures and Alogorithm

📂 PROJECTS

HireStar.io CandidateSelfVerification Portal   07/2024 – 02/2025
Developed a full-featured web portal providing multiple background verification services, allowing candidates to initiate verification requests on behalf of their employers. Designed and implemented a secure, user-friendly workflow that streamlined the verification process, enhanced transparency, and significantly reduced manual intervention for HR teams.

Tech Stack: API Context | React.js | MongoDB | Node.js | Express.js | Bootstrap | AWS | Redis

Hirestar.io Website   02/2025 – 08/2025

Designed and developed the company website for Dapplogix, a platform that offers a wide range of background verification services for organizations and candidates. Built with a focus on scalability, security, and user experience, the portal enables candidates to initiate verification requests on behalf of employers while streamlining HR operations.
