Priyanshu Gola

WEB DEVELOPER(FREELANCER)

About Me

I am comfortable in JavaScript, React, Core PHP, SQL, and AJAX, and I have a solid foundation with recent web development. I mostly utilize React to create user-friendly, responsive, and clean interfaces, and I'm always honing my UI development and component logic skills. I enjoy working on dynamic projects that focused on developing innovative websites, and my ability to think logically helps me handle difficulties effectively. I have excellent communication skills, am a great team player, and am dedicated to lifelong learning and development.

Project

💬 **Forum Web App – Full-Stack (PHP, SQL, JS, Bootstrap)**
• Developed a responsive forum with user authentication, threads, comments, search feature, and basic XSS protection.

🖼️ **Wallpaper Download Website**
• Created a clean, responsive wallpaper website where users can browse and download high-quality images.

🛒 **E-Commerce Website (E-Com Design) – Full-Stack (PHP, SQL, Bootstrap)**
• Built a modular e-commerce platform with product listing, cart system, checkout, and an admin dashboard for product management.

📰 **GolaNews – React + NewsAPI**
• Built a responsive news application fetching live articles through NewsAPI.
• Features multiple categories, infinite scrolling, and clean article viewer.

📝 **gNote – MERN Stack (React, Node, Express, MongoDB)**
• Developed a full note-management app with JWT authentication.
• Users can sign up, log in, add/edit/delete notes, and securely manage their data.
• Node + Express used for backend routes, MongoDB for storage, and React for the user interface.
